EDUCATION

B.Sc. in Computer Engineering, Islamic Azad University 2020 - 2025
Kermanshah, Iran
CGPA: **3.5**/4

RESEARCH INTERESTS

• AI Safety • AI Alignment • Explainable AI • AI for science

ACADEMIC EXPERIENCE

Research Intern | *ZEISS Lab @Medical University of Vienna, Austria (Remote)* Jan 2025 - Present
• Collaborated on designing and evaluating frequency-based explainability methods for neural networks.
• Co-authored manuscript with international team of researchers from Medical University of Vienna and ZEISS Lab.

Research Assistant | *Islamic Azad University* | *Supervised by Dr.Parandin* 2022 - 2025
• Contributed to the development and implementation of various ML models, including RNN, CNN, FNN and meta-learning frameworks.

Teaching Assistant | *Islamic Azad University* | *Supervised by Dr. Habibi* 2023
• TA of Computational Intelligence | • TA of Natural Language Processing

As a Teaching Assistant, I conducted teaching sessions, led class discussions, and provided support in understanding complex concepts. I also assisted students with assignments, offered feedback, and guided them through coding and problem-solving exercises.

AWARDS & HONORS

- Conducting a workshop on 'An Introduction to Artificial Intelligence' at Islamic Azad University 2023
- Interviewed by Hamshahri newspaper and hispanTV as the Student Inventor 2016
- Selected idea for the 8th Student Festival Nanoscience and Nanotechnology 2015
- Recognized exceptional talent by National Organization for Development of Exceptional Talents 2014

SKILLS

Programming	Python
Libraries	Scikit-learn, PyTorch, Auto-sklearn, TensorFlow, Matplotlib, NumPy, Pandas
Skills	Machine Learning, Data Analysis, Research Prowess, Optimization

PROJECTS

Securing Healthcare with Deep Learning: A CNN-Based Model for Medical IoT Threat Detection ★ 14
Developed and implemented a CNN-based model for detecting threats in IoMT environments. The proposed model achieved a perfect accuracy of 0.99 across binary, categorical, and multiclass classification tasks, outperforming previous state-of-the-art methods.

DECIDE-SIM *(In collaboration with Med Uni of Vienna)* ★ 5
DECIDE-SIM is a groundbreaking, open-source simulation framework designed to evaluate the ethical and cooperative behaviors of Large Language Model (LLM) agents in high-stakes survival scenarios. Our framework provides a systematic testbed to investigate how AI agents balance self-preservation, cooperation, and moral constraints when faced with resource scarcity and critical ethical dilemmas.
